

blackstone TEK

Hello Friends

BST enters the hallowed ground of TRIUMPH with the announcement of our BST Carbon Fiber wheels for the Triumph Rocket III. The wheels for this incredibly powerful brute are sleek and beautiful, and make a HUGE difference to the performance of the machine. The Triumph Rocket III owners' forum approached us first and their wheels are already on their bikes - thanks for your support, guys. Walt de Somerville tested the wheels and published his report on the forum ... "I am VERY, VERY impressed with the huge differences they have made in much lighter & quicker steering, improved acceleration, way better braking, and all-round sheer ride-ability. . . . the bike now handles as if it were 100lbs lighter."

### **BST and the TRIUMPH motorcycles**

BST wheels for the Rocket III weigh in at 3.65 kg for the front 3.5" x 18", and

6.7 kg for the rear wheel 8.5" x 18". BST wheels for the Speed Triple 1050 and the Triumph 675 are already available.

**OOOH La La - check this out ! How do you improve a 1098S !**

"Improve the best to obtain the maximum, this is the objective of RAM" so says IN MOTO of the new magnesium single sided swingarm designed and manufactured by RAM. Then RAM added to the 1098S the BST Black Mambas, and the press said "The bike obtains an incredible agility, entering and riding through a corner with an impressive nonchalance, even stopping distance and accelerating follow improved paces. For the keen rider these are great advantages, much superior to what can represent changing an exhaust line or the like" ... What can we say, other than "We told you so" ... thanks to Dino Cappa for showing this all at EICMA.

[See the RAM website for more info.](#)

**PIRELLI also showcased BST wheels**

Pirelli was at the EICMA show in Milan last month, and they chose BST carbon fibre wheels to showcase their new tires. Pirelli believe that the Diablo Rosso represents a breakthrough in sportbike tire performance. BST was proud to be on the platform with them. The best choose the best!

[See the Pirelli website for more info.](#)

So the TRIUMPH wheels are here. Next come the BMW and HyperMotard wheels. Please check out our website, or contact us if you need any more information, or talk to your Distributor.

South Africa in the fall is still 25 degrees with sun every day, perfect riding weather, surf and swimming ... eat your hearts out!

Best regards,  
The Team at BST
